Your Guide to Addictive Learning

With over ten years of experience in digital learning innovation, Anna helps organizations bring creativity and interactivity to corporate training.

At LYADIS, she and her team use Adobe Captivate to turn static courses into exceptional, interactive journeys that inspire, engage, and drive results.

Their approach blends creativity, design thinking, and learner psychology — proving that great learning isn't built… it's crafted.

What's in Store for Today?

Discover the Netflix Magic

Explore why streaming platforms captivate millions and how these principles revolutionize learning

Psychology of Binge-Learning

Understand the neuroscience behind binge-watching and apply it to course design

Live Adobe Captivate Demo

Use Adobe Captivate to structure your course as a season, with episodes, momentum, and cliffhangers

AI-Powered Creativity Tools

Discover Adobe Firefly & Express to amplify your visual storytelling

Interactive Q&A

Get your burning questions answered and connect with fellow designers

Quick Question: What's Your Favorite Show Right Now?

Think About It

What keeps you clicking "Next Episode" at 2 AM? What makes you cancel plans to finish just one more season?

The Hook

These shows master emotional storytelling, cliffhangers, and pacing that creates genuine anticipation. We're going to steal their secrets!

Why Do Netflix & Streaming Platforms Work So Well?

Intuitive Discovery

Seamless interface that invites exploration without overwhelming choices

Modern Design

Clean, cinematic visuals. Minimalist layouts that adapt seamlessly across devices.

Bite-Sized Episodes

Short, bingeable content that fits perfectly into busy modern schedules

Emotional Connection

Powerful storytelling that creates anticipation and keeps viewers invested

Irresistible Trailers

Compelling previews that tease content and build excitement before watching

From Streaming to Learning: Applying the Netflix Model

→ **Learner-Driven Exploration**

Replace mandatory training with curated pathways that invite discovery and choice

→ **Bite-Sized Modules**

Break content into 3–5-minute segments that maintain attention and build momentum

→ **Add interactions**

Turn learners into participants through choices, challenges, and feedback moments

→ **Blended Touchpoints**

Combine asynchronous content with live Q&A sessions and coaching moments

→ **Teasers & Trailers**

Create anticipation with compelling previews before launching full courses

Live Demo: Creating Binge-Worthy eLearning with Adobe Captivate

The Demo Walkthrough

Experiencing "The Compliance Code"

2

Behind the Scenes

How it was built in Adobe Captivate

Pro Tip: *The best eLearning feels effortless to consume but is strategically designed to maximize retention and engagement.*

Designing for Impact

Keep the Story Focused

A strong story guides learning — it shouldn't distract from it.

Balance Fun and Purpose

Every game element or interaction must serve a learning objective.

Simplify Navigation

A Netflix feel doesn't mean endless options — guide learners clearly.

Plan Visuals Early

Design your visual universe from the start — it saves time and ensures coherence.

Test Responsiveness

Learners stream on every device — make sure your design follows them.

Tease Your Training Like a Show

Hook Them Immediately

Craft course intros that grab attention in the first 10 seconds with bold questions, stunning visuals, or intriguing scenarios

Master the Cliffhanger

*Use episodic structure and strategic endings that make clicking "Next Module" irresistible*

Build Anticipation

Deploy countdowns, sneak peeks, and "coming up next" slides that create genuine excitement

Think of your course like a limited series: each module should satisfy while leaving learners eager for what's next.

Boost Creativity with Adobe Firefly & Adobe Express
